

## Kootznoowoo Overview

Kootznoowoo, Inc. is focused on providing our customers with exceptional service while maintaining impeccable safety on every job site. We view our staff, partners, and customers as a single team, with a focus on communication and collaboration to achieve all contract objectives.

Kootznoowoo is the corporation for the village of Angoon in Southeast Alaska which has a population of about 450 people. The majority of our shareholders are Tlingit Indian and have strong family and cultural ties to Angoon. Kootznoowoo was incorporated on November 9, 1973 and was named after Admiralty Island where Angoon is located.

Unlike other for-profit corporations, shares in Kootznoowoo cannot be bought, sold, or traded. Our original 629 shareholders each received 100 shares of stock after establishing their Alaska Native heritage and lineage to Angoon. Today, the number of shareholders has grown to 1,100.

## Synpact Overview

Synpact is a dynamic provider of managed communications and IT consulting services, based in Southern California, with over 25 years of experience in the industry. Synpact has established itself as a trusted partner for businesses seeking to enhance their technology infrastructure, streamline operations, and increase overall efficiency. The company offers a comprehensive suite of services, including managed IT services, unified communications, access control, video surveillance, and structured cabling.

Synpact's primary capabilities lie in its ability to deliver enterprise-level IT solutions tailored to meet the specific needs of its clients. With our Managed IT Services, Synpact provides robust managed IT solutions designed to reduce downtime, enhance productivity, and ensure the seamless operation of business-critical systems.

Synpact's unified communications services integrate voice, video, messaging, and data into a single, streamlined platform, enabling more effective and efficient communication across organizations. With our Access Control and Video Surveillance services, we enhance security and offer options of visual and verbal interaction.

Synpact's comprehensive structured cabling services, ensures reliable and high-performance network infrastructure, essential for supporting data, voice, and video services.

## Our Clients

### Here are just a couple of successful projects that exemplify merging multiple technologies for our clients;

#### A large law firm with seven offices on the West Coast and over 300 attorneys;

Synpact integrated multiple technology platforms to bring added capabilities, efficiency, performance, and significant cost savings for this client, which included.

- Upgrading their Voice system allows their offices to distribute calls between locations and to specific employees. Complete cabling infrastructure with over 1,000 cable runs
- Door Access Control for entry security in critical areas
- Network Infrastructure upgrades with server conversion to the cloud
- Desktop support and setting up a ticketing system for their employees to track help requests and offer specific Level of Service guarantees
- Vendor management of their key technologies

#### On another project in a low-income area, we took an apartment complex of 700 units.

- We have provided surveillance of the entire premises with notifications of any intrusions based on the time of day and specific areas.
- Door Access and monitors for tenants
- Ran cabling to administration and other key areas
- Voice system throughout the property
